

Frontend Feedback

1. Sell option should be visible every time to user, irrespective of the page. It should direct to post ad page if the user logged in otherwise it should show login page.

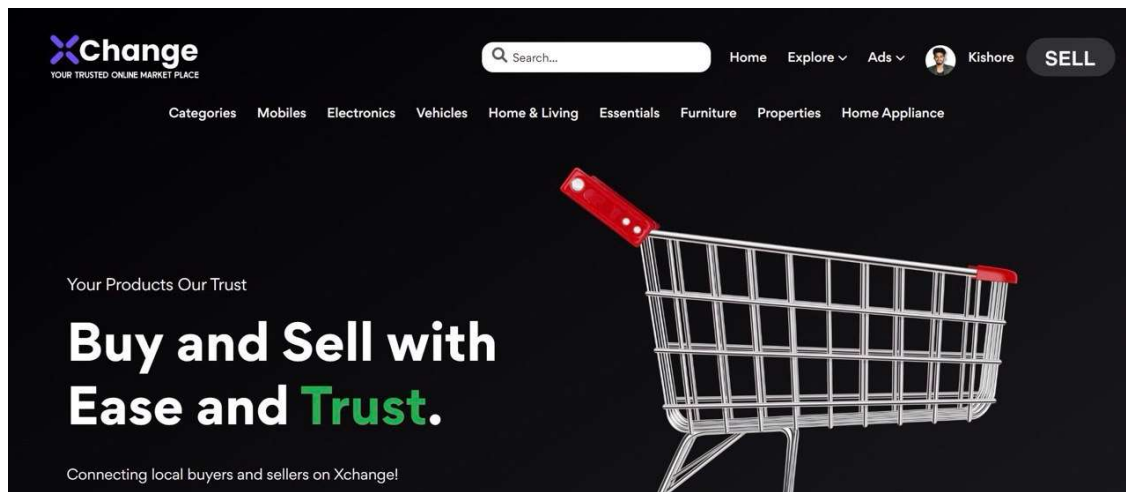

Figure 1 Desktop Version

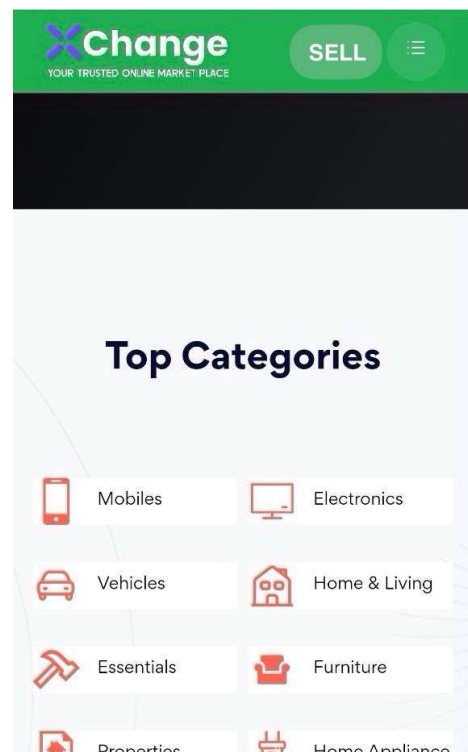

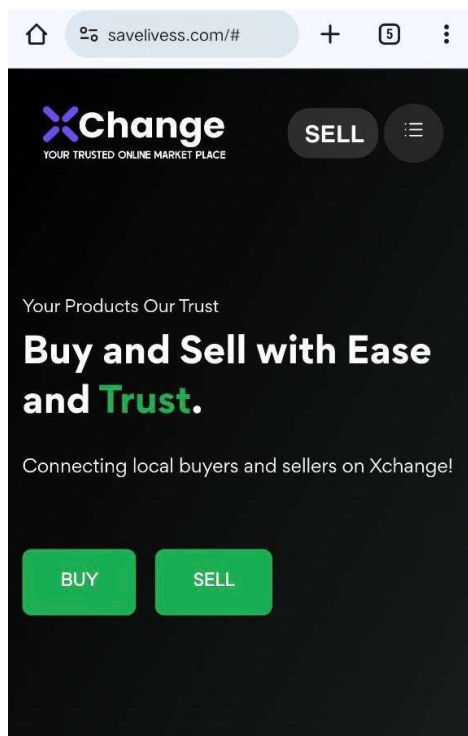

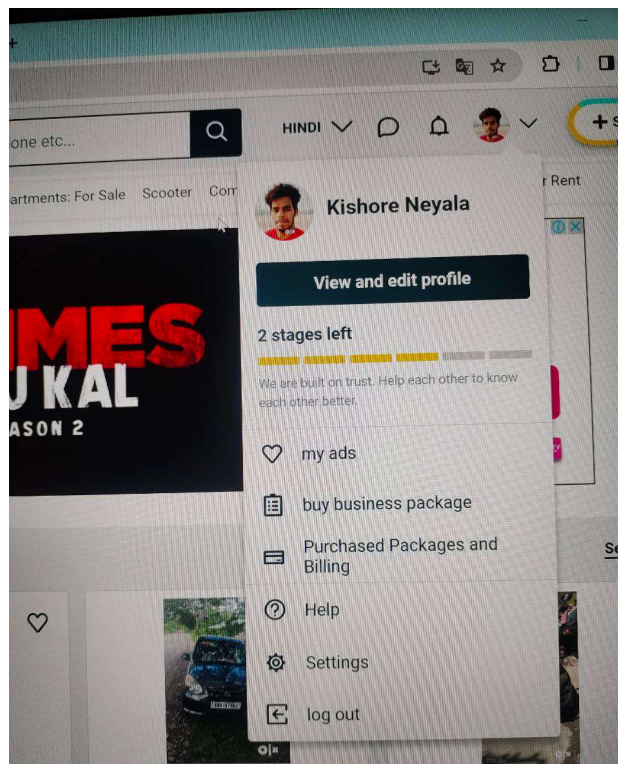

Figure 2&3 Mobile version

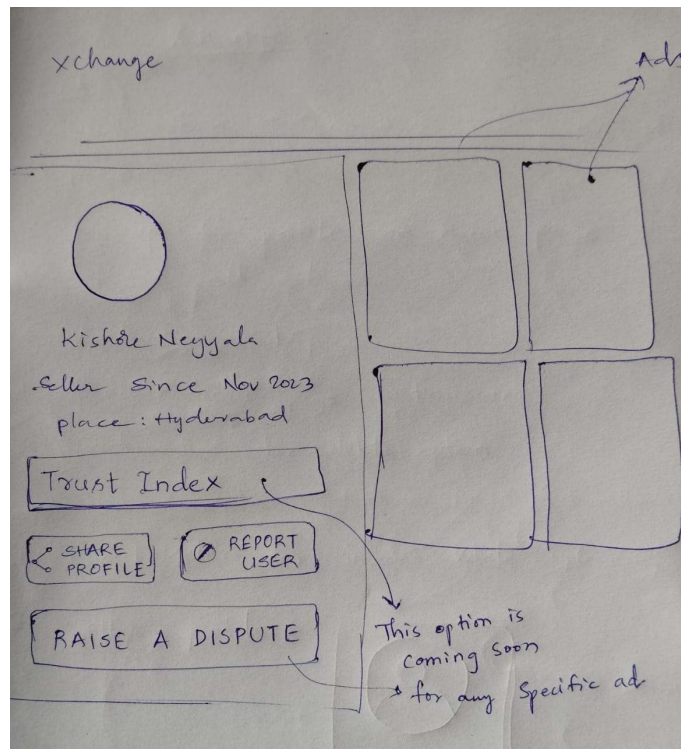

2. Pop-up should be visible for profile on home page showing all options similar to this.

3. Below our trusted sellers in the home page, change them like this. Clicking on view profile should show their complete profile.

4. Seller profile page after clicking view profile option.

5. Boxes for ads in first page or instead of boxes, keep shadows for existing boxes for better visibility.

Explore Popular Ads

6. Confirmation for delete option in my ads to prevent accidental touch and make those both update and delete options bold.
7. Cancel option for images while uploading. now we are completely erasing all details for changing image.so this option will be better.

8. Verification mail page customization, presently it's like this. Make it attractive, just like you did for forget password page. It should show 'Your account has been verified' if verified, if not then 'Please re-click the link in the mail' and there should be an option for going back to website like 'Continue posting ads'

9. Give a pop-up like 'This feature is coming soon' for options which are planned later, like chat with seller.
10. Remove that girl photo in about us page, keep a good image which matches the context. Think about it.
11. I need to know about Review option in ad details page, I'll text you later about this.
12. Keep location(📍 Kothapet, Hyderabad) instead of 2 or 3 days ago in the ad in preview version.

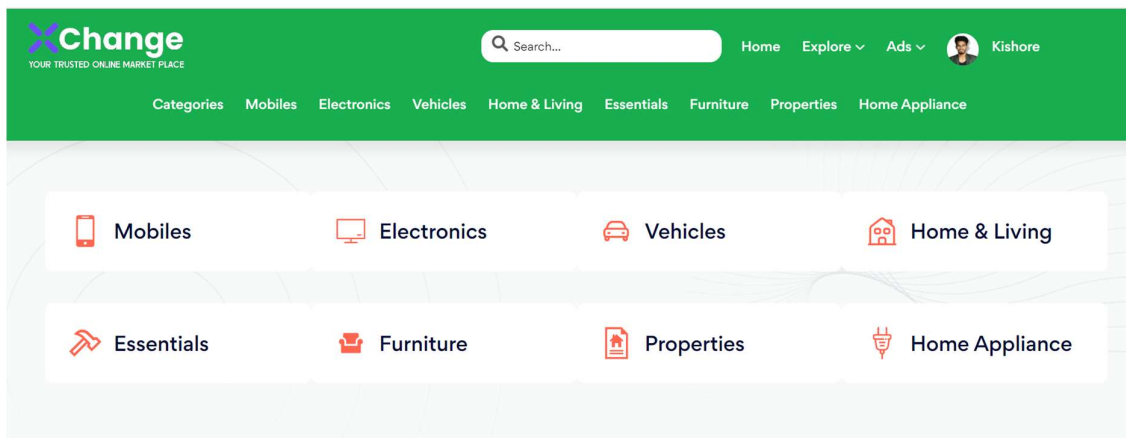

13. Make proper alignment everywhere, where box grid is there or it will be there.

Backend Feedback

1. Search bar optimization, all keywords(ad name, category, brand ...whatever they fill in the in ad details) should be linked to search bar, For example : As I posted Oppo buds, if someone search oppo in search bar, then the buds should come in the search results as I filled oppo in the ad details and similarly if someone search power bank or iPhone in the search bar, then the respective ads should be shown, if there's nothing matches, then it should show, 'No Results Matched'.

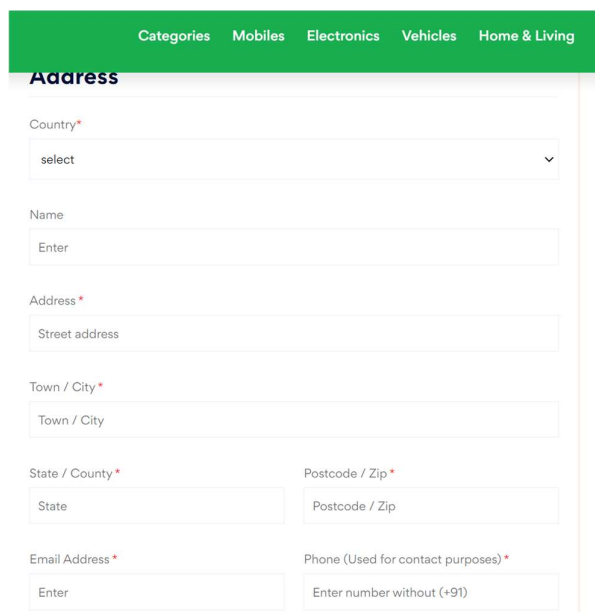

2. When we are clicking the categories options, it's redirecting to about us page, it should open respective ads of that category. In both places, like at the top and the below.

3. We added location in the ad, there it should be like 'Posted at : Place , City' not just place , example : Posted at : Kothapet , Hyderabad.

4. While posting ad, provide a list for states, instead of typing the entire state name.

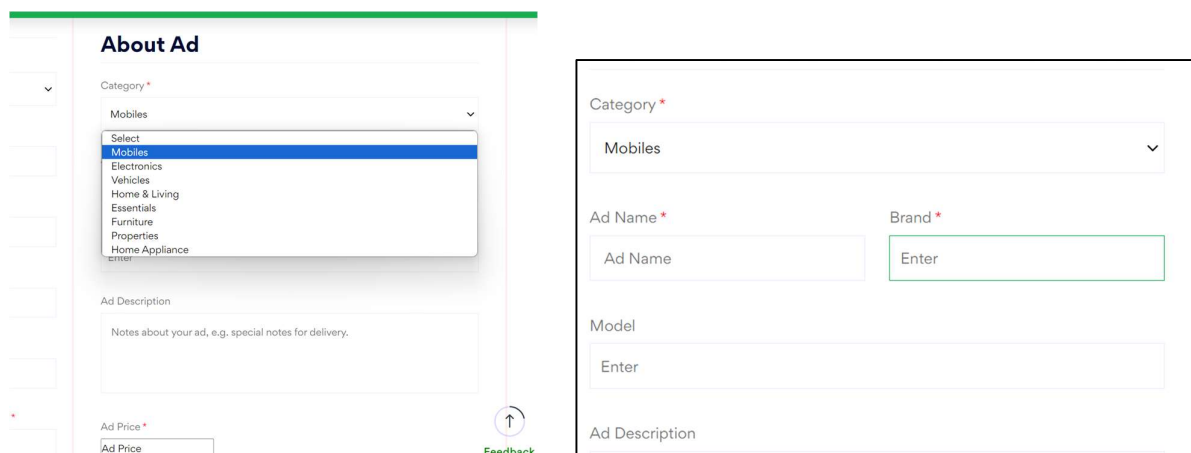

The image shows a form titled "Address" with a green header bar containing navigation links: Categories, Mobiles, Electronics, Vehicles, Home & Living, and B. The form fields are: Country* (dropdown menu with "select" and a downward arrow), Name (text input with "Enter" placeholder), Address* (text input with "Street address" placeholder), Town / City* (text input with "Town / City" placeholder), State / County* (text input with "State" placeholder), Postcode / Zip* (text input with "Postcode / Zip" placeholder), Email Address* (text input with "Enter" placeholder), and Phone (Used for contact purposes)* (text input with "Enter number without (+91)" placeholder).

5. After choosing Mobiles category, provide a list of mobile brands for brand option...This list should appear only after choosing mobiles. The list is

Apple, MI, Samsung, Vivo, One plus, Oppo, Realme, Motorola
Lenovo, Nokia, Honor, Google, Poco, Infinix, Iqoo, Nothing

At last, keep 'other' option for brands other than these.

The image shows two views of an "About Ad" form. The left view shows the "Category*" dropdown menu open, displaying a list of categories: Select, Mobiles (highlighted), Electronics, Vehicles, Home & Living, Essentials, Furniture, Properties, and Home Appliance. The right view shows the form with "Category*" set to "Mobiles". The form fields are: Category* (dropdown menu with "Mobiles" selected), Ad Name* (text input with "Ad Name" placeholder), Brand* (text input with "Enter" placeholder), Model (text input with "Enter" placeholder), and Ad Description (text input with "Notes about your ad, e.g. special notes for delivery." placeholder). There is also an "Ad Price*" field with a "Feedback" button below it.

6. For vehicles category, add another box, where we have to choose the type like, two types: 2-Wheeler & 4-Wheeler

For 2-Wheeler, give a list of bike brands

Royal Enfield, Aprilla, Bajaj, BMW, Ducati, Honda, KTM, Yamaha, Hero, TVS, Kawasaki, Harley Davidson, Suzuki, Jawa, Benelli, Triumph, Ola, Yezdi.

At last, keep 'other' option for brands other than these.

For 4 Wheelers, give a list of Car brands

Audi, BMW, Honda, Hyundai, Jeep, Kia, Chevrolet, Mahindra, Maruti Suzuki, MG, Toyota, Volkswagen, Nissan, Renault, Ford, Tata, Jaguar, Porsche, land rover.

At last, keep 'other' option for brands other than these.

7. Ad should delete only after taking confirmation from user, after completion of frontend part, link this accordingly.

8. Cancel the image if user clicks the cross button while uploading, after completion of frontend part, link this accordingly.

The screenshot shows the 'XChange' website's ad creation interface. The header is green with the 'XChange' logo (a purple 'X' followed by 'Change' in white) and the tagline 'YOUR TRUSTED ONLINE MARKET PLACE'. A search bar with a magnifying glass icon and the text 'Search...' is on the right. Navigation links include 'Home', 'Explore' (with a dropdown arrow), 'Ads' (with a dropdown arrow), and a user profile icon labeled 'Kishore'. Below the header, a horizontal menu lists categories: 'Categories', 'Mobiles', 'Electronics', 'Vehicles', 'Home & Living', 'Essentials', 'Furniture', 'Properties', and 'Home Appliance'. The main content area is a white form with a green border. It contains a 'Select' dropdown menu, a 'Negotiable*' dropdown menu with 'select' as the current value, and an 'Upload Photo*' section. The upload section includes a note 'Make sure size of each image Less than 1MB', a 'Choose File' button, and a file name 'buds6.jpg'. Below the file name are three image thumbnails, each with a small 'x' in the top right corner for deletion. The first two thumbnails show a pair of black headphones, and the third shows a single black earbud. At the bottom of the form are two green buttons: 'Post Ad' and 'Save As Draft'.
